Selenium + 100% ACE

What is Selenium + 100% ACE?

Selenium is an essential trace element that rarely occurs.

Selenium plays an important role in the detoxification of the body and is a component of some enzymes such as glutathione peroxidase. This enzyme promotes the transformation of free radicals into harmless derivatives.

Furthermore, it plays a role in the immune defense and in detoxification. Selenium is also important for the skin in protecting against UV radiation and can prevent premature cell ageing.
